

Sprint 1 Report

Product Name: MoCode

Team Name: MoCoders

Date: January 30, 2024

Actions to stop doing

As a team we feel that we should *stop*:

- We need to stop working on our designs and start focusing on the code

Actions to start doing

Similarly, after this Sprint we feel that we need to *start*:

- We need to start transferring our designs into code.
- Being more organized, pushing code to GitHub, updating others, etc.
- Ensuring team members are on the same page for implementation.

Actions to keep doing

So far we feel like the following actions have been working:

- Our scrum meetings are quick and productive, so we need to continue those.

Work Completed

List of User Stories we have completed in Sprint 1:

User Story	What it means	What we did
1.1: As a first-time user, I want to access an app where I can see a list of recommended LeetCode questions, so I can quickly start practicing without any confusion. [10 pts] (8 hours)	Build a front end so the user can use the app with a set of problems	Used Figma designs and translated them into our webpage components.

1.2: As a returning user, I need the ability to view my previously attempted questions and receive new recommendations, so I can continue my practice seamlessly. [5 pts] (8 hours)	Either use a database or pull progress from leetcode directly	We didn't get to this user story yet.
1.4: As a user, I want an app that is easy to access with a user-friendly interface. [10 pts] (3 hours)	Make sure the front end is easy to use and interact with	We made sure to have a simple design on Figma.

Work Not Completed

List of User Stories we have not completed in Sprint 1:

User Story	What it means	What we didn't do
1.3: As a job seeker, I want the app to focus on topics and questions that are commonly found in technical interviews, so I can be better prepared for my job interviews. [2 pts] (5 hours)	Pull questions from collections of questions based on company	We haven't yet considered recommending by company preferences. Right now our priority is using spatial repetition.

Work Completion Rate

Total Number of User Stories Completed: 3 U.S.

Total Number of *Estimated* Work Hours Completed: 26 Hours

Total Number of Days: 14 Days
